

A tree for Europe -

the symbolic first tree was planted on 9 November 2020

The big tree planting campaign from Germany has reached Parma!

On the occasion of the 30th anniversary of the German reunification, Scuola per l` Europa has launched a school greening project, to be achieved through planting new trees on the school grounds. The project was initiated by the German department and has received great support from the headmistress Mrs. Bertolini.

In compliance with all the Anticovid-19 rules, the pupils of class 3 were able to observe the process of tree planting and actively participate in it.

The aim is to plant new trees in order to provide Scuola per l` Europa with much needed shade and precious clean oxygen/air, not only to celebrate the anniversary of German reunification, which has favoured European unification and enlargement, but also to increase the pupils' environmental awareness.

On behalf of the German department:

Yvonne Ingler-Detken and Karin Oelschlägel
